

HCL CAT5e Cable and Accessories

CAT5e UTP Cable

The unshielded twisted pair cable finds its application in the Horizontal Cabling (HC) System or in the Backbone Cabling System. In the horizontal system, it functions as a connecting medium between the horizontal cross - connect and the wall outlet. In the backbone cabling system, it functions as a connecting medium between horizontal cross connect and main cross connect and/or HC to intermediate cross connect. HCL UTP cable is designed to exceed the performance requirements of EIA/TIA 568A/B, ISO/IEC 11801 and has obtained an independent UL approval for the same. It is supplied in convenient 305m box.

CAT5e UTP Jack Panel

HCL offers modular patch panels for termination of horizontal and backbone cabling. It has a robust construction and excellent cable management. It surpasses Enhanced Cat5 requirements of EIA/TIA. The RJ-45 module jacks and the Insulation Displacement Connectors (IDC) mounted on the Printed circuit board give the design an unmatched modularity and elegance.

CAT5e UTP Patch Cord

HCL CAT5e exceeds the minimum performance requirements for horizontal cable as specified under EIA/TIA 568 A/B. They are overmoulded with strain relief boots. They come in 1m, 2m, 3m and customizable lengths.

CAT5e UTP Surface Mount Box with IO

HCL Information Outlets have been engineered to ensure full-featured end-to-end connectivity that surpasses CAT 5e requirements. The front access for the cable prevents the entry of dust while the "perfect fit" connector holder design helps easy snap - in and removal of the keystone jacks. It has flame retardant Plastic body "UL-94V-0 rated". They come in 1, 2 and four port designs.
